Lacquered ash

(cm)

(inch)

Ash wood is durable material, with good resistance and flexibility. Thanks to its porosity, it is ideal to be lacquered. Its original color is quite light: it can range from light blond, to pink and pale brown, with possible shades of green. In our set of samples, it is available in the natural finish and in numerous color variations: from the classic wood effects to the most pop colors of the moment. The ash used for our materials is European.

CLEANING AND MAINTENANCE

Ash is an easy-to-clean wood: to remove dust or light stains, rub the surface with a soft cloth, if necessary moistened in a solution of hot water or white vinegar, to help eliminate stains without altering the beauty

and shine of the wood. Always dry the surface. In addition, you can choose to use specific products for wooden furniture.

These tips are cleaning recommendations and do not guarantee complete stain removal. We recommend that you always test the cleaning method on a hidden part of the item to check the resistance of the color.

Colour samples are to be considered approximate for each product. Slight color differences between a lot and the other are to be considered normal.

Materials Certifications

Stained ash veneered

Veneered woods are the result of a process of gluing extremely thin sheets of wood applied to various types of supports to produce furnishing elements, which have a similar appearance to solid wood, but with better performance in terms of resistance to woodworms, lightness and greater stability over time. If exposed to light, and in any case with the passage of time, the color of the veneer changes. It may happen that furniture of the same color purchased after some time, show color differences. Upon request, the veneered parts can be supplied with certified origin from forests managed in a correct and responsible manner, according to the rigorous environmental standards established by the FSC circuit.

CLEANING AND MAINTENANCE

For ordinary cleaning of veneered woods, use a cloth moistened with neutral soap well diluted in water or specific products. Always dry after each application with a dry cloth or paper towel. Do not use abrasive products. In case of accidental spills of substances or liquids, immediately dab the wood with paper towel or with a dry and clean cloth. Avoid proximity to heat sources. Evenly expose the veneered woods to light, for example by periodically opening the table extensions that are stored inside the structure, or by moving any object placed on the surface, such as vases and accessories.

These tips are cleaning recommendations and do not guarantee complete stain removal. We recommend that you always test the cleaning method on a hidden part of the item to check the resistance of the color.

Vintage leather

FIRE RESISTANCE: BS 5852 : 1979 BS EN 1021-1-2 : 2006

and the other are to be considered normal.

Vintage leather is a natural product and this is why it can show signs such as wrinkles, veining and scars that indicate the animal origin of the product. These signs, together with slightly color differences, are distinctive elements that enhance its beauty and distinguish it from faux leather or other artificial products. Vintage is a bovine leather from animals of European origin. This product is obtained starting from Nabuck leather, which is slightly equalized with aniline, and hand abraded to give an aged effect. The hand is very warm and silky.

CLEANING AND MAINTENANCE

Dust the leather product regularly with a soft and dry cloth. In case of stains, rub the affected area with a soft and clean cloth, moistened with water or use a light solution of water and mild soap, to be applied gently with a wet cloth. Move the cloth in a circular direction, starting from edges of the stain towards the center. Rinse well with a damp cloth. Dry immediately after treatment. Avoid direct sunlight and exposure to heat sources.

We recommend that you always test the cleaning method on a hidden part of the item to check the resistance of the color.

These tips are cleaning recommendations and do not guarantee complete stain removal. In case of large stains, we recommend contacting an operator specialized in upholstered products cleaning.

Materials Certifications

Secret faux leather

COMPOSITION: 76% PVC - 2% PU 22% PES MARTINDALE: 100.000 cycles

FIRE RESISTANCE: UNI 9175 classe 1IM EN 1021-1 EN 1021-2 BS 5852-1 cigarette test BS 5852-1 match test TB 117:2013

Secret is the Flukso® fireproof coating with a soft hand, similar to that of real leather. Secret has been designed to create soft upholstery for interiors. Its

elastic rear structure in polyester allows it to adapt to the new geometries of furniture, ensuring resistance and durability over time.

CLEANING AND MAINTENANCE

Regular cleaning is important to extend the life of the coating, and keep its appearance unchanged. Dust and dirt can wear out the coating and damage the fire protection.

REGULAR CLEANING: vacuum frequently at a power equal to half the device in use, choosing a smooth spout, without brushing.

STAIN REMOVAL: in case of slight stains, promptly clean the surface. Remove excess liquids or hard parts of dirt with a clean cloth, then proceed on the residue

of the stain with a damp cloth or a neutral soap solution. Remove the stain starting from the edge of the stain moving towards the center of it, then rinse with water. Let dry, avoiding direct exposure to sunlight. For localized and more persistent stains, promptly dissolve the stain with colorless ethyl alcohol diluted in 20% water, gently rub and then treat with a neutral soap solution, then rinse well. Do not use bleach.

These tips are cleaning recommendations and do not guarantee complete stain removal. In case of large stains, we recommend contacting an operator specialized in upholstered products cleaning. We recommend to not expose light colored coating for a prolonged time to garments treated with colors

with poor dyeing fastness, as the color pigments could penetrate the surface of the faux leather, without being able to be removed.

We recommend to always test the cleaning method on a hidden part of the item to check the color resistance.

Colour samples are to be considered approximate for each product. Slight color differences between a lot and the other are to be considered normal.

FIRE RESISTANCE: UNI 9175 classe 1IM EN 1021-1 EN 1021-2 BS 5852-1 cigarette test BS 5852-1 match test

Vintage is the faux leather by Flukso, a fire-resistant coated fabric in 'cloud effect' refined colours, created to dress upholstered furniture with timeless elegance.

The fabric surface is made using a microscopic texture which makes it similar to natural leather to the touch. Vintage features a special mesh fabric construction,

slightly elastic, that makes it easily adaptable to the new modern shapes of upholstered furniture and

guarantees long life. Soft, enveloping and fire resistant, this fabric adapts to contract or residential spaces.

CLEANING AND MAINTENANCE

Regular cleaning is important to extend the life of the coating, and keep its appearance unchanged. Dust and dirt can wear out the coating and damage the fire protection.

REGULAR CLEANING: vacuum frequently at a power equal to half the device in use, choosing a smooth spout, without brushing.

STAIN REMOVAL: in case of slight stains, promptly clean the surface.
